**Exploring the relationship between religion and the state**

Focusing on the intersection of religion, law, and politics in contemporary liberal democracies, Blackford considers the concept of the secular state, revising and updating enlightenment views for the present day. It makes an original contribution to current debates about freedom of religion, and addresses a whole range of hot-button issues that involve the relationship between religion and the state, including the teaching of evolution in schools, what to do about the burqa, and so on.
