Deployed Virtual Consulting: The Fusion of Wearable Computing, Collaborative Technology, Augmented Reality and Intelligent Agents to Support Fleet Aviation Maintenance

James M. Nasman

This is a NAVAL POSTGRADUATE SCHOOL MONTEREY CA report procured by the Pentagon and made available for public release. It has been reproduced in the best form available to the Pentagon. It is not spiral-bound, but rather assembled with Velobinding in a soft, white linen cover. The Storming Media report number is A183224. The abstract provided by the Pentagon follows: This thesis addresses the need of Naval Aviation Maintenance to streamline and more effectively manage the process of technical consultation aboard deployed aircraft carriers. The current process involves the physical transportation of an appropriate technician to the carrier to perform required maintenance and/or repairs. In light of the technology currently available this process becomes obviously obsolete, overly costly and needlessly time consuming. By implementing wireless technology in combination with advanced software allowing the virtual collaboration of parties widely separated by geographical distance the Navy can establish a "virUal technical presence" onboard aircraft carriers wherever they may be in the world. This thesis will describe how the fusion of wearable computing, augmented reality, intelligent agents coupled with CoABS, and a modem collaborative software application can revolutionize Naval aviation maintenance as we know it. The technology is there - it only remains for the Navy to leverage it and take advantage of the significant returns that it will provide.

From reader reviews:

Amanda Dell:

With other case, little people like to read book Deployed Virtual Consulting: The Fusion of Wearable Computing, Collaborative Technology, Augmented Reality and Intelligent Agents to Support Fleet Aviation Maintenance. You can choose the best book if you want reading a book. Provided that we know about how is important the book Deployed Virtual Consulting: The Fusion of Wearable Computing, Collaborative Technology, Augmented Reality and Intelligent Agents to Support Fleet Aviation Maintenance. You can add information and of course you can around the world by just a book. Absolutely right, because from book you can know everything! From your country right up until foreign or abroad you will end up known. About simple thing until wonderful thing you can know that. In this era, we can easily open a book or even searching by internet device. It is called e-book. You can utilize it when you feel uninterested to go to the library. Let's examine.

Lawrence Richardson:

What do you in relation to book? It is not important with you? Or just adding material when you need something to explain what your own problem? How about your spare time? Or are you busy person? If you don't have spare time to perform others business, it is make you feel bored faster. And you have spare time? What did you do? Every person has many questions above. They have to answer that question mainly because just their can do this. It said that about e-book. Book is familiar in each person. Yes, it is suitable. Because start from on kindergarten until university need this Deployed Virtual Consulting: The Fusion of Wearable Computing, Collaborative Technology, Augmented Reality and Intelligent Agents to Support Fleet Aviation Maintenance to read.

Janice Pyles:

The particular book Deployed Virtual Consulting: The Fusion of Wearable Computing, Collaborative Technology, Augmented Reality and Intelligent Agents to Support Fleet Aviation Maintenance will bring you to the new experience of reading a new book. The author style to spell out the idea is very unique. If you try to find new book to read, this book very suited to you. The book Deployed Virtual Consulting: The Fusion of Wearable Computing, Collaborative Technology, Augmented Reality and Intelligent Agents to Support Fleet Aviation Maintenance is much recommended to you to read. You can also get the e-book in the official web site, so you can quickly to read the book.

Anthony Balentine:

Do you like reading a book? Confuse to looking for your best book? Or your book had been rare? Why so many issue for the book? But any people feel that they enjoy with regard to reading. Some people likes reading, not only science book but additionally novel and Deployed Virtual Consulting: The Fusion of

Wearable Computing, Collaborative Technology, Augmented Reality and Intelligent Agents to Support Fleet Aviation Maintenance or even others sources were given expertise for you. After you know how the great a book, you feel desire to read more and more. Science e-book was created for teacher or even students especially. Those books are helping them to include their knowledge. In different case, beside science publication, any other book likes Deployed Virtual Consulting: The Fusion of Wearable Computing, Collaborative Technology, Augmented Reality and Intelligent Agents to Support Fleet Aviation Maintenance to make your spare time much more colorful. Many types of book like this.
