In the Mind Fields: Exploring the New Science of Neuropsychanalysis Casey Schwartz

Neuroscience and psychoanalysis are historically opposed responses to the age-old quest to understand ourselves—one focused on the brain and the other on the mind. As part of a pioneering program to look for common ground between the two warring disciplines, Casey Schwartz spent one year immersed in psychoanalytic theory at the Anna Freud Centre, and the next year studying the brain among Yale's cutting-edge neuroscientists. She came away with a clear picture of the distance between the two fields: while neuroscience is lacking in attention to lived experience, psychoanalysis is often too ephemeral and subjective. Armed with this awareness, Schwartz set out to study the main pioneers in the emerging and controversial field of neuropsychanalysis. With passion and humor, she makes a trenchant argument for a hybrid scientific culture that will allow the two approaches to thrive together.
