Swarm Intelligence and Bio-Inspired Computation: Theory and Applications (Elsevier Insights)

Swarm Intelligence and Bio-Inspired Computation: Theory and Applications (Elsevier Insights)

Swarm Intelligence and Bio-Inspired Computation: Theory and Applications (Elsevier Insights)

Swarm Intelligence and bio-inspired computation have become increasing popular in the last two decades. Bio-inspired algorithms such as ant colony algorithms, bat algorithms, bee algorithms, firefly algorithms, cuckoo search and particle swarm optimization have been applied in almost every area of science and engineering with a dramatic increase of number of relevant publications. This book reviews the latest developments in swarm intelligence and bio-inspired computation from both the theory and application side, providing a complete resource that analyzes and discusses the latest and future trends in research directions. It can help new researchers to carry out timely research and inspire readers to develop new algorithms. With its impressive breadth and depth, this book will be useful for advanced undergraduate students, PhD students and lecturers in computer science, engineering and science as well as researchers and engineers.

- Focuses on the introduction and analysis of key algorithms
- Includes case studies for real-world applications
- Contains a balance of theory and applications, so readers who are interested in either algorithm or applications will all benefit from this timely book.

From reader reviews:

Eloise Torres:

Why don't make it to become your habit? Right now, try to ready your time to do the important behave, like looking for your favorite reserve and reading a reserve. Beside you can solve your short lived problem; you can add your knowledge by the publication entitled Swarm Intelligence and Bio-Inspired Computation: Theory and Applications (Elsevier Insights). Try to stumble through book Swarm Intelligence and Bio-Inspired Computation: Theory and Applications (Elsevier Insights) as your buddy. It means that it can to be your friend when you really feel alone and beside associated with course make you smarter than ever before. Yeah, it is very fortuned for yourself. The book makes you more confidence because you can know every thing by the book. So , let us make new experience as well as knowledge with this book.

Charles Wilkerson:

The book Swarm Intelligence and Bio-Inspired Computation: Theory and Applications (Elsevier Insights) can give more knowledge and also the precise product information about everything you want. So just why must we leave the great thing like a book Swarm Intelligence and Bio-Inspired Computation: Theory and Applications (Elsevier Insights)? A few of you have a different opinion about e-book. But one aim that book can give many details for us. It is absolutely proper. Right now, try to closer together with your book. Knowledge or info that you take for that, you are able to give for each other; it is possible to share all of these. Book Swarm Intelligence and Bio-Inspired Computation: Theory and Applications (Elsevier Insights) has simple shape but you know: it has great and massive function for you. You can search the enormous world by open up and read a reserve. So it is very wonderful.

Roxanne Pineda:

Is it a person who having spare time then spend it whole day simply by watching television programs or just laying on the bed? Do you need something new? This Swarm Intelligence and Bio-Inspired Computation: Theory and Applications (Elsevier Insights) can be the solution, oh how comes? The new book you know. You are and so out of date, spending your free time by reading in this new era is common not a geek activity. So what these publications have than the others?

Vicky Gamez:

As we know that book is significant thing to add our information for everything. By a guide we can know everything you want. A book is a list of written, printed, illustrated as well as blank sheet. Every year had been exactly added. This reserve Swarm Intelligence and Bio-Inspired Computation: Theory and Applications (Elsevier Insights) was filled with regards to science. Spend your time to add your knowledge about your technology competence. Some people has various feel when they reading any book. If you know how big good thing about a book, you can truly feel enjoy to read a book. In the modern era like now, many ways to get book that you wanted.
