Complex Survey Data Analysis with SAS

Taylor H. Lewis

Complex Survey Data Analysis with SAS Taylor H. Lewis

Complex Survey Data Analysis with SAS® is an invaluable resource for applied researchers analyzing data generated from a sample design involving any combination of stratification, clustering, unequal weights, or finite population correction factors. After clearly explaining how the presence of these features can invalidate the assumptions underlying most traditional statistical techniques, this book equips readers with the knowledge to confidently account for them during the estimation and inference process by employing the SURVEY family of SAS/STAT® procedures.

The book offers comprehensive coverage of the most essential topics, including:

- Drawing random samples
- Descriptive statistics for continuous and categorical variables
- Fitting and interpreting linear and logistic regression models
- Survival analysis
- Domain estimation
- Replication variance estimation methods
- Weight adjustment and imputation methods for handling missing data

The easy-to-follow examples are drawn from real-world survey data sets spanning multiple disciplines, all of which can be downloaded for free along with syntax files from the author's website: <http://mason.gmu.edu/~tlewis18/>.

While other books may touch on some of the same issues and nuances of complex survey data analysis, none features SAS exclusively and as exhaustively. Another unique aspect of this book is its abundance of handy workarounds for certain techniques not yet supported as of SAS Version 9.4, such as the ratio estimator for a total and the bootstrap for variance estimation.

Taylor H. Lewis is a PhD graduate of the Joint Program in Survey Methodology at the University of Maryland, College Park, and an adjunct professor in the George Mason University Department of Statistics. An avid SAS user for 15 years, he is a SAS Certified Advanced programmer and a nationally recognized SAS educator who has produced dozens of papers and workshops illustrating how to efficiently and effectively conduct statistical analyses using SAS.

From reader reviews:

Louise Hacker:

Why don't make it to be your habit? Right now, try to ready your time to do the important action, like looking for your favorite guide and reading a guide. Beside you can solve your condition; you can add your knowledge by the guide entitled Complex Survey Data Analysis with SAS. Try to make the book Complex Survey Data Analysis with SAS as your buddy. It means that it can be your friend when you sense alone and beside regarding course make you smarter than ever before. Yeah, it is very fortunated for you. The book makes you much more confidence because you can know every thing by the book. So , let us make new experience and also knowledge with this book.

Mark Bunnell:

Do you certainly one of people who can't read satisfying if the sentence chained inside straightway, hold on guys this kind of aren't like that. This Complex Survey Data Analysis with SAS book is readable through you who hate the straight word style. You will find the info here are arrange for enjoyable studying experience without leaving even decrease the knowledge that want to supply to you. The writer involving Complex Survey Data Analysis with SAS content conveys the idea easily to understand by many individuals. The printed and e-book are not different in the content material but it just different in the form of it. So , do you still thinking Complex Survey Data Analysis with SAS is not loveable to be your top record reading book?

Eileen Moore:

As we know that book is essential thing to add our know-how for everything. By a guide we can know everything we would like. A book is a set of written, printed, illustrated as well as blank sheet. Every year had been exactly added. This reserve Complex Survey Data Analysis with SAS was filled about science. Spend your extra time to add your knowledge about your research competence. Some people has diverse feel when they reading the book. If you know how big good thing about a book, you can sense enjoy to read a book. In the modern era like currently, many ways to get book that you simply wanted.

Fred Musso:

Reading a reserve make you to get more knowledge from the jawhorse. You can take knowledge and information from the book. Book is created or printed or highlighted from each source that will filled update of news. On this modern era like now, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science reserve, encyclopedia, reference book, new and comic. You can add your understanding by that book. Ready to spend your spare time to open your book? Or just seeking the Complex Survey Data Analysis with SAS when you essential it?
