Lectures on Resolution of Singularities (AM-166) (Annals of Mathematics Studies)

János Kollár

Lectures on Resolution of Singularities (AM-166) (Annals of Mathematics Studies) János Kollár

Resolution of singularities is a powerful and frequently used tool in algebraic geometry. In this book, János Kollár provides a comprehensive treatment of the characteristic 0 case. He describes more than a dozen proofs for curves, many based on the original papers of Newton, Riemann, and Noether. Kollár goes back to the original sources and presents them in a modern context. He addresses three methods for surfaces, and gives a self-contained and entirely elementary proof of a strong and functorial resolution in all dimensions. Based on a series of lectures at Princeton University and written in an informal yet lucid style, this book is aimed at readers who are interested in both the historical roots of the modern methods and in a simple and transparent proof of this important theorem.

From reader reviews:

Paul Henson:

In this 21st centuries, people become competitive in most way. By being competitive now, people have do something to make these people survives, being in the middle of the particular crowded place and notice by simply surrounding. One thing that oftentimes many people have underestimated the idea for a while is reading. Yep, by reading a book your ability to survive raise then having chance to stand up than other is high. In your case who want to start reading a book, we give you that Lectures on Resolution of Singularities (AM-166) (Annals of Mathematics Studies) book as nice and daily reading book. Why, because this book is more than just a book.

Juan Hinkson:

Do you among people who can't read gratifying if the sentence chained inside straightway, hold on guys this kind of aren't like that. This Lectures on Resolution of Singularities (AM-166) (Annals of Mathematics Studies) book is readable through you who hate those straight word style. You will find the details here are arrange for enjoyable reading experience without leaving also decrease the knowledge that want to offer to you. The writer involving Lectures on Resolution of Singularities (AM-166) (Annals of Mathematics Studies) content conveys prospect easily to understand by a lot of people. The printed and e-book are not different in the content but it just different as it. So , do you nevertheless thinking Lectures on Resolution of Singularities (AM-166) (Annals of Mathematics Studies) is not loveable to be your top record reading book?

Ellis Arnold:

Information is provisions for individuals to get better life, information today can get by anyone in everywhere. The information can be a knowledge or any news even restricted. What people must be consider while those information which is inside the former life are challenging to be find than now could be taking seriously which one is acceptable to believe or which one the resource are convinced. If you receive the unstable resource then you understand it as your main information you will have huge disadvantage for you. All of those possibilities will not happen in you if you take Lectures on Resolution of Singularities (AM-166) (Annals of Mathematics Studies) as your daily resource information.

Lamar Carr:

Reading a publication can be one of a lot of activity that everyone in the world really likes. Do you like reading book so. There are a lot of reasons why people enjoyed. First reading a reserve will give you a lot of new data. When you read a book you will get new information due to the fact book is one of a number of ways to share the information or perhaps their idea. Second, studying a book will make a person more imaginative. When you looking at a book especially hype book the author will bring you to imagine the story how the personas do it anything. Third, you can share your knowledge to others. When you read this Lectures on Resolution of Singularities (AM-166) (Annals of Mathematics Studies), you could tells your

family, friends in addition to soon about yours publication. Your knowledge can inspire average, make them reading a e-book.
