## Representation Type Of Commutative Noetherian Rings Iii: Global Wildness And Tameness (Memoirs of the American Mathematical Society) Lee Klingler, Lawrence S. Levy, Lee Klingler

This memoir completes the series of papers beginning with [KL1, KL2], showing that, for a commutative noetherian ring  $\Lambda$ , either the category of  $\Lambda$ -modules of finite length has wild representation type or else we can describe the category of finitely generated  $\Lambda$ -modules, including their direct-sum relations and local-global relations. (There is a possible exception to our results, involving characteristic 2.)
