Mathematical Foundations of Statistical Mechanics A. Khinchin

2014 Reprint of 1949 Edition. Full facsimile of the original edition, not reproduced with Optical Recognition Software. The translation of this important work brings to the American mathematician and physicist a useful work of statistical mechanics. It offers a precise and mathematically satisfactory formulation of the problems of statistical mechanics and provides the analytic tools needed to replace many of the cumbersome concepts and devices commonly found in more basic works on the subject. And above all, it furnishes the mathematician approaching the subject for the first time with a logical, step-by-step introduction, written in mathematical terms, to aid in mastering the subject in the shortest possible time. Contents Include: Geometry and kinematics of the phase space. -- Ergodic problem. -- Reduction to the problem of the theory of probability. -- Application of the central limit theorem. -- Ideal monatomic gas. -- The foundation of thermodynamics. -- Dispersion and the distributions of sum functions. Aleksandr Khinchin was a Soviet mathematician and one of the most significant people in the Soviet school of probability theory.

From reader reviews:

Mary Ponce:

The book Mathematical Foundations of Statistical Mechanics can give more knowledge and information about everything you want. Why then must we leave the great thing like a book Mathematical Foundations of Statistical Mechanics? Several of you have a different opinion about e-book. But one aim in which book can give many information for us. It is absolutely suitable. Right now, try to closer together with your book. Knowledge or information that you take for that, you may give for each other; you may share all of these. Book Mathematical Foundations of Statistical Mechanics has simple shape however you know: it has great and large function for you. You can look the enormous world by open and read a guide. So it is very wonderful.

Betty Blake:

In this period globalization it is important to someone to obtain information. The information will make professionals understand the condition of the world.
