The Fractal

William DeCotiis

The Fractal William DeCotiis

The ancient Greeks and Romans believed the “golden ratio” was at the heart of understanding the cosmos and believed that ideals possessing a sense of order and proportion represented more than just beauty but the ultimate wisdom of the universe. Following this ancient thought, the author uses the concept of a "fractal" to explain major themes in nature, philosophy, scientific thought, the arts, social structure, economic structure, individual behavior, cognitive learning, performance, life generally, and finally time itself. These concepts are accompanied by a series of personal anecdotes from the author's own life which serve to explain the overall theory.
