Flood Hazard Identification and Mitigation in Semi- And Arid Environments

Richard H. French

Flood Hazard Identification and Mitigation in Semi- And Arid Environments Richard H. French

Alluvial fans are ubiquitous geomorphological features that occur throughout the world, regardless of climate, at the front of mountains as the result of erosion and deposition. They are more prominent in semi- and arid climates simply because of the lack of vegetative cover that masks their fan shapes in more humid areas. From both engineering and geological viewpoints, alluvial fans present particular fluvial and sedimentation hazards in semi- and arid regions because episodic rainfall-runoff events can result in debris, mud, and fluvial flows through complex and, in some cases, migratory channel systems. Further, in semi- and arid climates alluvial fans often end in terminal or playa lakes. Given the uniform topography of playa lakes, these features often present ideal locations for facilities such as airports; however, regardless of the engineering advantages of the topography, the episodic and often long-term flooding of these lakes attracts migratory birds. The purpose of this volume is to summarize the current state-of-the-art, from the viewpoint of engineering, in the identification and mitigation of flood hazard on alluvial fans; and to accomplish this a fundamental understanding of geology is required.

From reader reviews:

Steve Bennett:

The book untitled Flood Hazard Identification and Mitigation in Semi- And Arid Environments is the guide that recommended to you you just read. You can see the quality of the reserve content that will be shown to an individual. The language that article author use to explained their ideas are easily to understand. The author was did a lot of investigation when write the book, so the information that they share for your requirements is absolutely accurate. You also can get the e-book of Flood Hazard Identification and Mitigation in Semi- And Arid Environments from the publisher to make you far more enjoy free time.

Aaron Martinez:

Why? Because this Flood Hazard Identification and Mitigation in Semi- And Arid Environments is an unordinary book that the inside of the publication waiting for you to snap the item but latter it will jolt you with the secret it inside. Reading this book beside it was fantastic author who else write the book in such awesome way makes the content inside easier to understand, entertaining approach but still convey the meaning entirely. So , it is good for you because of not hesitating having this ever again or you going to regret it. This phenomenal book will give you a lot of gains than the other book have such as help improving your talent and your critical thinking approach. So , still want to postpone having that book? If I had been you I will go to the reserve store hurriedly.

Joel Barnhardt:

Your reading 6th sense will not betray an individual, why because this Flood Hazard Identification and Mitigation in Semi- And Arid Environments publication written by well-known writer we are excited for well how to make book which can be understand by anyone who read the book. Written with good manner for you, leaking every ideas and writing skill only for eliminate your own personal hunger then you still question Flood Hazard Identification and Mitigation in Semi- And Arid Environments as good book not merely by the cover but also by the content. This is one publication that can break don't determine book by its protect, so do you still needing another sixth sense to pick this specific!?! Oh come on your reading through sixth sense already said so why you have to listening to an additional sixth sense.

Ellen McNulty:

As we know that book is very important thing to add our understanding for everything. By a book we can know everything we really wish for. A book is a pair of written, printed, illustrated or blank sheet. Every year ended up being exactly added. This book Flood Hazard Identification and Mitigation in Semi- And Arid Environments was filled concerning science. Spend your spare time to add your knowledge about your science competence. Some people has distinct feel when they reading any book. If you know how big benefit from a book, you can feel enjoy to read a reserve. In the modern era like currently, many ways to get book that you simply wanted.
