Geotechnical Engineering

R. K. Khitoliya, Pardeep Kumar Gupta

Geotechnical Engineering R. K. Khitoliya, Pardeep Kumar Gupta

The book exhaustively deals with the fundamental principles of soil mechanics and aims to serve the needs of B.E., and B. Tech students of Civil Engineering. It covers the syllabi of almost all technical universities and institutes. The concepts have been developed systematically. A large number of graded numerical examples and solutions are included. References are made to the relevant Indian standard codes at appropriate places. New concepts like Critical-State Concept, Three-Dimensional Consolidation and Stress Path Method have also been included in the book. The book will be useful for degree & diploma students of Civil Engineering, practising engineers and students appearing in various competitive examinations including AMIE. The Book broadly deals with: Basic Terminology and Interrelations Index Properties of Soils Soil Classification Systems Soil Water and Effectives Stress Permeability Seepage Analysis Stress Distribution in Soil Mass Compaction Consolidation Shear Strength of Soils Lateral Earth Pressure and Earth Retaining Structures Stability of Slopes Contents: Introduction / Basic Terminology and Interrelations / Index Properties of Soils / Soil Classification Systems / Soil Water and Effectives Stress / Permeability / Seepage Analysis / Stress Distribution in Soil Mass / Compaction / Consolidation / Shear Strength of Soils / Lateral Earth Pressure and Earth Retaining Structures / Stability of Slopes / References/Bibliography / Index. Audience: B.E and B. Tech Civil Engineering Students

From reader reviews:

Frank Hegarty:

Book is written, printed, or highlighted for everything. You can recognize everything you want by a reserve. Book has a different type. We all know that that book is important factor to bring us around the world. Beside that you can your reading skill was fluently. A publication Geotechnical Engineering will make you to always be smarter. You can feel a lot more confidence if you can know about every thing. But some of you think that will open or reading a book make you bored. It is not make you fun. Why they might be thought like that? Have you looking for best book or appropriate book with you?

Harold Walsh:

This Geotechnical Engineering are usually reliable for you who want to certainly be a successful person, why. The reason of this Geotechnical Engineering can be one of the great books you must have is definitely giving you more than just simple looking at food but feed a person with information that might be will shock your prior knowledge. This book will be handy, you can bring it just about everywhere and whenever your conditions in the e-book and printed types. Beside that this Geotechnical Engineering giving you an enormous of experience for example rich vocabulary, giving you test of critical thinking that we understand it useful in your day action. So , let's have it and revel in reading.

Cindy Coleman:

The reason? Because this Geotechnical Engineering is an unordinary book that the inside of the e-book waiting for you to snap the idea but latter it will jolt you with the secret it inside. Reading this book alongside it was fantastic author who write the book in such wonderful way makes the content inside easier to understand, entertaining way but still convey the meaning entirely. So , it is good for you for not hesitating having this any longer or you going to regret it. This unique book will give you a lot of rewards than the other book include such as help improving your ability and your critical thinking way. So , still want to postpone having that book? If I were being you I will go to the publication store hurriedly.

Harold Esparza:

What is your hobby? Have you heard that question when you got college students? We believe that that problem was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. And also you know that little person including reading or as examining become their hobby. You must know that reading is very important in addition to book as to be the thing. Book is important thing to add you knowledge, except your personal teacher or lecturer. You see good news or update in relation to something by book. Amount types of books that can you take to be your object. One of them is niagra Geotechnical Engineering.
