Light Alloys, Fourth Edition: From Traditional Alloys to Nanocrystals

Ian Polmear, David St. John Ph.D.

Light Alloys, Fourth Edition: From Traditional Alloys to Nanocrystals Ian Polmear, David St. John Ph.D.

The definitive overview of the science and metallurgy of aluminum, magnesium, titanium and beryllium alloys, this is the only book available covering the background materials science, properties, manufacturing processes and applications of these key engineering metals in a single accessible volume. Use of these metals is now more widespread than ever, and they are routinely found in motor vehicles and aircraft. New material includes materials characteristics and applications; heat treatment properties; fabrication; microstructure/property relationships; new applications and processes.

- * The definitive single volume overview
- * New material on processing, characteristics and applications of these essential metals
- * Covers the latest applications and processes in the auto and aero industries
