Exploiting Hidden Structure in Matrix Computations: Algorithms and Applications: Cetraro, Italy 2015 (Lecture Notes in Mathematics) Michele Benzi, Dario Bini, Daniel Kressner, Hans Munthe-Kaas, Charles Van Loan

Focusing on special matrices and matrices which are in some sense 'near' to structured matrices, this volume covers a broad range of topics of current interest in numerical linear algebra. Exploitation of these less obvious structural properties can be of great importance in the design of efficient numerical methods, for example algorithms for matrices with low-rank block structure, matrices with decay, and structured tensor computations. Applications range from quantum chemistry to queuing theory.

Structured matrices arise frequently in applications. Examples include banded and sparse matrices, Toeplitz-type matrices, and matrices with semi-separable or quasi-separable structure, as well as Hamiltonian and symplectic matrices. The associated literature is enormous, and many efficient algorithms have been developed for solving problems involving such matrices.

The text arose from a C.I.M.E. course held in Cetraro (Italy) in June 2015 which aimed to present this fast growing field to young researchers, exploiting the expertise of five leading lecturers with different theoretical and application perspectives.

From reader reviews:

Tracy Caudle:

Now a day people that Living in the era where everything reachable by match the internet and the resources in it can be true or not demand people to be aware of each information they get. How people have to be smart in having any information nowadays? Of course the solution is reading a book. Looking at a book can help folks out of this uncertainty Information especially this Exploiting Hidden Structure in Matrix Computations: Algorithms and Applications: Cetraro, Italy 2015 (Lecture Notes in Mathematics) book since this book offers you rich data and knowledge. Of course the data in this book hundred per cent guarantees there is no doubt in it you know.

Joyce Burke:

This Exploiting Hidden Structure in Matrix Computations: Algorithms and Applications: Cetraro, Italy 2015 (Lecture Notes in Mathematics) tend to be reliable for you who want to be a successful person, why. The main reason of this Exploiting Hidden Structure in Matrix Computations: Algorithms and Applications: Cetraro, Italy 2015 (Lecture Notes in Mathematics) can be one of the great books you must have is actually giving you more than just simple examining food but feed an individual with information that maybe will shock your before knowledge. This book is definitely handy, you can bring it just about everywhere and whenever your conditions in the e-book and printed kinds. Beside that this Exploiting Hidden Structure in Matrix Computations: Algorithms and Applications: Cetraro, Italy 2015 (Lecture Notes in Mathematics) forcing you to have an enormous of experience like rich vocabulary, giving you demo of critical thinking that we all know it useful in your day exercise. So , let's have it appreciate reading.

Thelma Martin:

You can spend your free time to see this book this reserve. This Exploiting Hidden Structure in Matrix Computations: Algorithms and Applications: Cetraro, Italy 2015 (Lecture Notes in Mathematics) is simple to bring you can read it in the playground, in the beach, train along with soon. If you did not get much space to bring often the printed book, you can buy often the e-book. It is make you simpler to read it. You can save the particular book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.

Herman Pendergrass:

What is your hobby? Have you heard that will question when you got scholars? We believe that that issue was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. And you know that little person including reading or as reading through become their hobby. You must know that reading is very important and book as to be the factor. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You discover good news or update in relation to something by book. Different

categories of books that can you choose to adopt be your object. One of them is this Exploiting Hidden Structure in Matrix Computations: Algorithms and Applications: Cetraro, Italy 2015 (Lecture Notes in Mathematics).
