## Orthopedic and Sports Medicine Case Studies for Advanced Practice Nurses

This one-of-a-kind book delivers challenging, clinically relevant case-based learning tools regarding orthopedics and sports medicine for advanced practice nursing students and practitioners. Written by nurse practitioner/educators, it fills a gap in information and guidelines for treatment of this population in primary and acute care environments. Cases across the lifespan cover areas of orthopedics and sports medicine most likely to be encountered.

Cases are described in depth to foster a comprehensive learning experience and to facilitate inductive and deductive critical reasoning. Each follows a template that encompasses the context for the case, chief patient complaints and history along with physical assessment findings, diagnostic evaluation, interventions, evaluation of care and outcome, and references for additional information. An accompanying teaching guide aids instructors in accelerating critical thinking.

### Key Features:

- Fills an identified gap in available literature
- Reflects both primary care and acute care across the lifespan
- Includes referral red flags and scope of practice for each case
- Formats cases for both inductive and deductive reasoning
- Offers focused instructor manual to facilitate meaningful learning
