Mathematical Modeling: Applications with GeoGebra

Jonas Hall, Thomas Lingefjärd

Mathematical Modeling: Applications with GeoGebra Jonas Hall, Thomas Lingefjärd

A logical problem-based introduction to the use of GeoGebra for mathematical modeling and problem solving within various areas of mathematics

A well-organized guide to mathematical modeling techniques for evaluating and solving problems in the diverse field of mathematics, *Mathematical Modeling: Applications with GeoGebra* presents a unique approach to software applications in GeoGebra and WolframAlpha. The software is well suited for modeling problems in numerous areas of mathematics including algebra, symbolic algebra, dynamic geometry, three-dimensional geometry, and statistics. Featuring detailed information on how GeoGebra can be used as a guide to mathematical modeling, the book provides comprehensive modeling examples that correspond to different levels of mathematical experience, from simple linear relations to differential equations.

Each chapter builds on the previous chapter with practical examples in order to illustrate the mathematical modeling skills necessary for problem solving. Addressing methods for evaluating models including relative error, correlation, square sum of errors, regression, and confidence interval, *Mathematical Modeling: Applications with GeoGebra* also includes:

- Over 400 diagrams and 300 GeoGebra examples with practical approaches to mathematical modeling that help the reader develop a full understanding of the content
- Numerous real-world exercises with solutions to help readers learn mathematical modeling techniques
- A companion website with GeoGebra constructions and screencasts

Mathematical Modeling: Applications with GeoGebra is ideal for upper-undergraduate and graduate-level courses in mathematical modeling, applied mathematics, modeling and simulation, operations research, and optimization. The book is also an excellent reference for undergraduate and high school instructors in mathematics.

From reader reviews:

Sabra Fitzgerald:

The book *Mathematical Modeling: Applications with GeoGebra* give you a sense of feeling enjoy for your spare time. You need to use to make your capable a lot more increase. Book can for being your best friend when you getting strain or having big problem using your subject. If you can make looking at a book *Mathematical Modeling: Applications with GeoGebra* for being your habit, you can get more advantages, like add your own capable, increase your knowledge about a few or all subjects. You could know everything if you like open and read a book *Mathematical Modeling: Applications with GeoGebra*. Kinds of book are several. It means that, science guide or encyclopedia or others. So , how do you think about this book?

Roxie Lloyd:

As people who live in the particular modest era should be up-date about what going on or facts even knowledge to make them keep up with the era which is always change and move ahead. Some of you maybe can update themselves by reading through books. It is a good choice for yourself but the problems coming to an individual is you don't know which one you should start with. This *Mathematical Modeling: Applications with GeoGebra* is our recommendation to make you keep up with the world. Why, since this book serves what you want and want in this era.

Terrance Oneal:

Does one one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you just dont know the inside because don't ascertain book by its protect may doesn't work is difficult job because you are afraid that the inside maybe not because fantastic as in the outside appearance likes. Maybe you answer could be *Mathematical Modeling: Applications with GeoGebra* why because the excellent cover that make you consider with regards to the content will not disappoint anyone. The inside or content will be fantastic as the outside or cover. Your reading sixth sense will directly guide you to pick up this book.

Evelyn Wiley:

A lot of book has printed but it differs from the others. You can get it by internet on social media. You can choose the top book for you, science, witty, novel, or whatever by simply searching from it. It is named of book *Mathematical Modeling: Applications with GeoGebra*. You can add your knowledge by it. Without causing the printed book, it could possibly add your knowledge and make a person happier to read. It is most crucial that, you must aware about e-book. It can bring you from one location to other place.
