Basics of Modern Mathematical Statistics: Exercises and Solutions (Springer Texts in Statistics)

Wolfgang Karl Härdle, Vladimir Spokoiny, Vladimir Panov, Weining Wang

The complexity of today's statistical data calls for modern mathematical tools. Many fields of science make use of mathematical statistics and require continuous updating on statistical technologies. Practice makes perfect, since mastering the tools makes them applicable. Our book of exercises and solutions offers a wide range of applications and numerical solutions based on R.

In modern mathematical statistics, the purpose is to provide statistics students with a number of basic exercises and also an understanding of how the theory can be applied to real-world problems.

The application aspect is also quite important, as most previous exercise books are mostly on theoretical derivations. Also we add some problems from topics often encountered in recent research papers.

The book was written for statistics students with one or two years of coursework in mathematical statistics and probability, professors who hold courses in mathematical statistics, and researchers in other fields who would like to do some exercises on math statistics.

From reader reviews:

Eva Burton:

Many people spending their moment by playing outside with friends, fun activity having family or just watching TV the entire day. You can have new activity to invest your whole day by examining a book. Ugh, do you consider reading a book can really hard because you have to take the book everywhere? It alright you can have the e-book, getting everywhere you want in your Touch screen phone. Like Basics of Modern Mathematical Statistics: Exercises and Solutions (Springer Texts in Statistics) which is obtaining the e-book version. So , try out this book? Let's observe.

Marianne Haglund:

Is it an individual who having spare time subsequently spend it whole day by simply watching television programs or just resting on the bed? Do you need something new? This Basics of Modern Mathematical Statistics: Exercises and Solutions (Springer Texts in Statistics) can be the solution, oh how comes? The new book you know. You are so out of date, spending your free time by reading in this completely new era is common not a geek activity. So what these books have than the others?

Alberto Redden:

That publication can make you to feel relax. This book Basics of Modern Mathematical Statistics: Exercises and Solutions (Springer Texts in Statistics) was multi-colored and of course has pictures on the website. As we know that book Basics of Modern Mathematical Statistics: Exercises and Solutions (Springer Texts in Statistics) has many kinds or genre. Start from kids until adolescents. For example Naruto or Investigation company Conan you can read and feel that you are the character on there. So , not at all of book usually are make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book for you and try to like reading that will.

Mary Jones:

What is your hobby? Have you heard this question when you got pupils? We believe that that issue was given by teacher to the students. Many kinds of hobby, Everyone has different hobby. And you know that little person including reading or as reading through become their hobby. You need to understand that reading is very important and book as to be the thing. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You see good news or update concerning something by book. Different categories of books that can you decide to try be your object. One of them is niagra Basics of Modern Mathematical Statistics: Exercises and Solutions (Springer Texts in Statistics).
