Construction Mathematics

Surinder Virdi, Roy Baker

Construction Mathematics Surinder Virdi, Roy Baker

Taking a starting point below that of GCSE level, by assuming no prior mathematical knowledge, Surinder Virdi and Roy Baker take the reader step by step through the mathematical requirements for Level 2 and 3 Building and Construction courses.

Unlike the majority of basic level maths texts available, this book focuses exclusively on mathematics as it is applied in actual construction practice. As such, topics specific to the construction industry are presented, as well as essential areas for Level 2 craft NVQs – for example, costing calculations, labor costs, cost of materials and setting out of building components.

End of chapter exercises cover a range of theoretical as well as practical problems commonly found in construction practice, and two project-based assignments give students the opportunity to apply the knowledge they have gained. Answers to all exercises are included at the end of book. A chapter detailing the use of a scientific calculator for performing construction calculations will prove invaluable for students with no prior experience of their use.

Construction Mathematics addresses all the mathematical requirements of Level 2 construction NVQs from City & Guilds/CITB and Edexcel courses, including the BTEC First Diploma in Construction. Additional coverage of the core unit Analytical Methods from BTEC National Construction, Civil Engineering, and Building Services courses makes this an essential revision aid to students who do not have Level 2 mathematics experience before commencing their BTEC National studies, or any reader who wishes to refresh their mathematics knowledge.

From reader reviews:

Stacey Sims:

What do you in relation to book? It is not important with you? Or just adding material when you want something to explain what your own problem? How about your free time? Or are you busy person? If you don't have spare time to perform others business, it is make you feel bored faster. And you have extra time? What did you do? Every person has many questions above. They should answer that question due to the fact just their can do that will. It said that about guide. Book is familiar in each person. Yes, it is suitable. Because start from on kindergarten until university need this particular Construction Mathematics to read.

Laura Dumas:

In this 21st millennium, people become competitive in most way. By being competitive at this point, people have do something to make them survives, being in the middle of the crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated the item for a while is reading. Sure, by reading a guide your ability to survive increase then having chance to stay than other is high. For you personally who want to start reading a book, we give you this particular Construction Mathematics book as basic and daily reading publication. Why, because this book is more than just a book.

Manuel Porter:

Reading a guide tends to be new life style within this era globalization. With reading through you can get a lot of information that will give you benefit in your life. Using book everyone in this world can easily share their idea. Books can also inspire a lot of people. A lot of author can inspire all their reader with their story or perhaps their experience. Not only the storyline that share in the textbooks. But also they write about the information about something that you need case in point. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors on this planet always try to improve their skill in writing, they also doing some study before they write to the book. One of them is this Construction Mathematics.

Elizabeth Maez:

What is your hobby? Have you heard that will question when you got pupils? We believe that that issue was given by teacher on their students. Many kinds of hobby, All people has different hobby. And you also know that little person similar to reading or as studying become their hobby. You have to know that reading is very important along with book as to be the matter. Book is important thing to include you knowledge, except your personal teacher or lecturer. You discover good news or update regarding something by book. Numerous books that can you go onto be your object. One of them is this Construction Mathematics.
