**Transport Studies of the Electrical, Magnetic and Thermoelectric properties of Topological Insulator Thin Films (Springer Theses) Jinsong Zhang**

This book presents the transport studies of topological insulator thin films grown by molecular beam epitaxy. Through band structure engineering, the ideal topological insulators,  $(\text{Bi}_{1-x}\text{Sbx})_2\text{Te}_3$  ternary alloys, are successfully fabricated, which possess truly insulating bulk and tunable conducting surface states. Further transport measurements on these ternary alloys reveal a disentanglement between the magnetoelectric and thermoelectric properties. In magnetically doped topological insulators, the fascinating quantum anomalous Hall effect was experimentally observed for the first time. Moreover, the topology-driven magnetic quantum phase transition was systematically controlled by varying the strength of the spin-orbital coupling. Readers will not only benefit from the description of the technique of transport measurements, but will also be inspired by the understanding of topological insulators.

### **From reader reviews:**

#### **Kathleen Owens:**

In this 21st millennium, people become competitive in every way. By being competitive currently, people have to do something to make these people survive, being in the middle of the crowded place and notice by means of surrounding. One thing that at times many people have underestimated the item for a while is reading. Yep, by reading an e-book your ability to survive is boosted then having a chance to stand up than others is high. For you who want to start reading the book, we give you that *Transport Studies of the Electrical, Magnetic and Thermoelectric properties of Topological Insulator Thin Films (Springer Theses)* book as a starter and daily reading reserve. Why, because this book is usually more than just a book.

#### **Homer Douglas:**

Beside this *Transport Studies of the Electrical, Magnetic and Thermoelectric properties of Topological Insulator Thin Films (Springer Theses)* in your phone, it could possibly give you a way to get nearer to the new knowledge or facts. The information and the knowledge you may get here is fresh in the oven so don't be worried if you feel like an old person living in a narrow village. It is a good thing to have *Transport Studies of the Electrical, Magnetic and Thermoelectric properties of Topological Insulator Thin Films (Springer Theses)* because this book offers to your account readable information. Do you sometimes have a book but you rarely get what it's about. Oh come on, that will not happen if you have this in your hand. The enjoyable arrangement here cannot be questionable, such as treasuring a beautiful island. So do you still want to miss the item? Find this book and read it from right now!

#### **Kathryn Cortez:**

Within this era which is the greater individual or who has the ability to do something more are more precious than others. Do you want to become one among them? It is just a simple approach to have that. What you must do is just spending your time not very much but quite enough to experience a look at some books. One of the books in the top collection in your reading list will be *Transport Studies of the Electrical, Magnetic and Thermoelectric properties of Topological Insulator Thin Films (Springer Theses)*. This book that is qualified as *The Hungry Mountains* can get you closer in growing to be a precious person. By looking right up and reviewing this book you can get many advantages.

#### **Nicholas Thiede:**

As a student exactly feel bored to help reading. If their teacher asked them to go to the library as well as to make a summary for some guide, they are complained. Just minor students that have reading's heart or real their pastime. They just do what the instructor wants, like asked to the library. They go to generally there but nothing reading seriously. Any students feel that reading through is not important, boring and can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this era, many ways to get whatever we want. Likewise words say, many ways to reach

Chinese's country. Therefore , this Transport Studies of the Electrical, Magnetic and Thermoelectric properties of Topological Insulator Thin Films (Springer Theses) can make you experience more interested to read.
