## Lectures on Functor Homology (Progress in Mathematics)

This book features a series of lectures that explores three different fields in which functor homology (short for homological algebra in functor categories) has recently played a significant role. For each of these applications, the functor viewpoint provides both essential insights and new methods for tackling difficult mathematical problems.

In the lectures by Aurélien Djament, polynomial functors appear as coefficients in the homology of infinite families of classical groups, e.g. general linear groups or symplectic groups, and their stabilization. Djament's theorem states that this stable homology can be computed using only the homology with trivial coefficients and the manageable functor homology. The series includes an intriguing development of Scorichenko's unpublished results.

The lectures by Wilberd van der Kallen lead to the solution of the general cohomological finite generation problem, extending Hilbert's fourteenth problem and its solution to the context of cohomology. The focus here is on the cohomology of algebraic groups, or rational cohomology, and the coefficients are Friedlander and Suslin's strict polynomial functors, a conceptual form of modules over the Schur algebra.

Roman Mikhailov's lectures highlight topological invariants: homotopy

and homology of topological spaces, through derived functors of polynomial functors. In this regard the functor framework makes better use of naturality, allowing it to reach calculations that remain beyond the grasp of classical algebraic topology.

Lastly, Antoine Touzé's introductory course on homological algebra makes the book accessible to graduate students new to the field.

The links between functor homology and the three fields mentioned above offer compelling arguments for pushing the development of the functor viewpoint. The lectures in this book will provide readers with a feel for functors, and a valuable new perspective to apply to their favourite problems.

### From reader reviews:

#### **Alison Caulfield:**

This Lectures on Functor Homology (Progress in Mathematics) book is not really ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book is definitely information inside this guide incredible fresh, you will get facts which is getting deeper anyone read a lot of information you will get. That Lectures on Functor Homology (Progress in Mathematics) without we understand teach the one who reading it become critical in contemplating and analyzing. Don't possibly be worry Lectures on Functor Homology (Progress in Mathematics) can bring if you are and not make your carrier space or bookshelves' turn out to be full because you can have it within your lovely laptop even cell phone. This Lectures on Functor Homology (Progress in Mathematics) having fine arrangement in word as well as layout, so you will not sense uninterested in reading.

#### **Eric Beasley:**

Why? Because this Lectures on Functor Homology (Progress in Mathematics) is an unordinary book that the inside of the book waiting for you to snap that but latter it will zap you with the secret this inside. Reading this book alongside it was fantastic author who all write the book in such wonderful way makes the content inside of easier to understand, entertaining way but still convey the meaning fully. So , it is good for you for not hesitating having this anymore or you going to regret it. This amazing book will give you a lot of benefits than the other book possess such as help improving your ability and your critical thinking means. So , still want to delay having that book? If I have been you I will go to the book store hurriedly.

#### **Rachel Leadbetter:**

Playing with family within a park, coming to see the marine world or hanging out with friends is thing that usually you may have done when you have spare time, in that case why you don't try issue that really opposite from that. One particular activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Lectures on Functor Homology (Progress in Mathematics), you can enjoy both. It is good combination right, you still want to miss it? What kind of hang-out type is it? Oh can happen its mind hangout men. What? Still don't have it, oh come on its identified as reading friends.

#### **Linda Justice:**

You will get this Lectures on Functor Homology (Progress in Mathematics) by visit the bookstore or Mall. Only viewing or reviewing it could possibly to be your solve challenge if you get difficulties for your knowledge. Kinds of this reserve are various. Not only by simply written or printed but can you enjoy this book simply by e-book. In the modern era such as now, you just looking by your mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your e-book. It is most important to arrange you to ultimately make your knowledge are still upgrade. Let's try to choose suitable ways for you.
